DEBT MANAGEMENT COUNSELING, Debt Consolidation Services

If the client and counselor agree that the DMP is the best option, the client will make one monthly payment to CCCS that will be disbursed to their creditors. Most creditors will bring past due accounts current after they receive three consecutive payments through CCCS. There is a nominal servicing fee; 100% of payments are disbursed to their creditors.

We can help clients work with their lender or landlord to save the clients home from foreclosure or eviction from their apartment and help understand what their options are. If the client is a senior citizen who wants to stay in the home, but is finding it harder to afford repairs or taxes, reverse equity mortgage counselors can help clients understand reverse mortgages and how they can help.

The plan may include services provided in the home, the community and/or private rehabilitation agencies. The consultant may provide counseling and guidance to the family, advocacy services, educational consultation and vocational coordination.

CBVH also provides children with the opportunity to attend summer camps and year-round recreation programs that they might not otherwise be able to attend without the support of the Commission for the Blind and Visually Handicapped. The goal of the recreation programs is to provide children with opportunities that encourage independence and increase self-confidence.

Services:

Objectives: The Wilton Wildlife Preserve and Park's mission is to conserve ecological systems and natural settings while providing opportunities for environmental education and outdoor recreation. The Wilton Wildlife Preserve and Park is a non-profit organization that partners with the Town of Wilton, Saratoga County, the NYS Department of Environmental Conservation and the Nature Conservancy to conserve ecological systems and natural settings while providing opportunities for environmental education and recreation. The Wilton Wildlife Preserve and Park is part of the geologically significant Saratoga Sand plains. This area of ancient sand dunes, small but important wetlands and diverse ecological communities is home to the federally endangered Karner blue butterfly, the threatened Frosted elfin, and the Hognose snake species of special concern. While the Karner blue butterfly was the catalyst behind the effort to conserve this increasingly rare landscape, within just a few years of the establishment of the Preserve and Park, other extremely rare species, the Eastern spadefoot toad and the Blanding's turtle were discovered on its protected lands. Today, almost 2,400 acres of protected land and 14 miles of trails protect significant habitats and provide a wonderfully fun, healthy, and educational place for children and their families. Educational programming and recreational opportunities are at the heart of the organization. We provide a full range of educational programs for the public throughout the year and work with local schools, scout groups and others to present programs at the Preserve and Park and off-site. We have several events during the year including our Moonlight Ski and Snowshoe, our Lupine Festival, a 5k Fun Run series in the summer and an 8k snowshoe race in the winter.
